

IN SCIENCE LIVES HOPE.

About University of Cincinnati Medical Center

As the flagship hospital of UC Health, Greater Cincinnati's academic health system, University of Cincinnati Medical Center has served the Greater Cincinnati and Northern Kentucky region for nearly 200 years.

Each year, hundreds of thousands of patients receive care from our world-renowned clinicians and care teams. Our physician experts utilize the most advanced medical knowledge and technology available, providing a level of specialty and subspecialty medical care unavailable anywhere else in Greater Cincinnati.

UC Medical Center is also home to medical breakthroughs: our physician experts conduct basic, translational and clinical research, leading to new therapies and care protocols and connecting patients to the latest and most advanced treatments.

With our partners at the UC College of Medicine, UC Medical Center has been home to many medical firsts, including: the first FDA-approved prescription antihistamine, Benadryl; the oral polio vaccine; the country's first training program for emergency medicine physicians; and development of the clot-busting drug tissue plasminogen activator, or tPA, the first FDA-approved treatment for stroke.

UC Medical Center also provides Greater Cincinnati's only Level I adult trauma center, which means the right mix of specialists and medical resources is available at a moment's notice for a wide variety of medical conditions and injuries.
