

2021 Community Health Needs Assessment

Addendum: Daniel Drake Center for Post-Acute Care

In 2021 the Daniel Drake Center for Post-Acute Care participated, as part of UC Health, in the collaborative development of a Regional Community Health Needs Assessment (CHNA) for Greater Cincinnati and Greater Dayton. This process, led by the Health Collaborative, incorporated considerable community input, including both community and provider surveys, focus groups, and stakeholder interviews. This addendum will be published with the CHNA Report in 2022. The addendum identifies significant regional health needs, and it also updates the status of the prior Implementation Plan.

The Daniel Drake Center for Post-Acute Care has adopted the region's top priorities as identified in the Regional CHNA. In addition to the region's top priorities, Daniel Drake Center also included maternal/infant health as a CHNA priority due to its prevalence as an unmet health need in the population served by UC Health.

Prioritized CHNA Needs

Priorities

The top priorities for the Daniel Drake Center for Post-Acute Care are:

1. Increase access to services in order to improve equitable outcomes for the region's top health care needs: behavioral health, cardiovascular disease, dental, vision and maternal/infant health.
2. Address access to and use of resources for food and housing, with a focus on the development and strengthening of partnerships between providers and community-based organizations.
3. Strengthen workforce pipeline and diversity, including cultural competence within the healthcare ecosystem.

Final Update of 2019 Plan

Priority/Priorities Targeted	Strategy	Overview of Project	Final Status
Access to care/services	Stop the Bleed	The goal of Stop the Bleed is to reduce the number of people who die from uncontrolled bleeding during mass casualty events by training ordinary citizens in lifesaving bleeding control techniques. Increase number of trained members in the community.	<p>FY20 – 93 classes - 2,623 participants FY21 – 19 classes – 540 participants FY22 – 31 classes – 952 participants</p> <p>COVID-19 Impact: Stop the Bleed Classes placed on hold Mar 2020 – Mar 2021. Responsible restart guidelines developed Aug 11, 2020. Shut back down Jan. 2022 due to COVID-19 surge.</p> <p>Returned to Health Gap’s Annual Health Expo – April 30, 2022</p>
